

INDIANA STATEWIDE CONGRESSIONAL TERM LIMITS POLL: EXECUTIVE SUMMARY

Indiana Survey of 500 Voters Conducted January 14-16, 2022

by RMG Research

Survey Summary: An overwhelming 76% of Indiana voters support an amendment to the U.S. Constitution limiting the terms of all U.S. Senators and U.S. House Representatives. The intensity of this support is measured in their willingness to vote for state legislators who will vote "yes" on term limits and against those who will vote "no" against term limits on members of Congress.

Do you approve or disapprove of placing term limits on members of Congress?

The U.S. Constitution authorizes state legislatures to call for a convention that would recommend amendments for Congressional terms limits. Two-thirds of the states would have to agree before any action could be taken. Would you favor or oppose having Indiana call for an amendment proposing convention?

At present the Indiana State Legislature does NOT have term limits on itself. If your state legislator voted to place term limits on Congress through an amendment proposing convention, would that make you more likely or less likely to vote for your state legislator?

Conclusions: An overwhelming 76% of Indiana voters support an amendment to the U.S. Constitution limiting the terms of all U.S. Senators and U.S. House Representatives. The intensity of this support is measured in their willingness to vote for state legislators who will vote "yes" on term limits and against those who will vote "no" against term limits on members of Congress.

Methodology: The survey of 500 Registered Voters was conducted online by Scott Rasmussen on January 14-16, 2022. Field work for the survey was conducted by RMG Research, Inc. Certain quotas were applied, and the sample was lightly weighted by geography, gender, age, race, education, internet usage, and political party to reasonably reflect the state's population of Registered Voters. Other variables were reviewed to ensure that the final sample is representative of that population.

The margin of sampling error for the full sample is +/- 4.5 percentage points.
